

Recommended for use in preparation for the revised CHES® and MCHES® examinations effective 2021

A Competency-Based Framework for Health Education Specialists - 2020

NEW RELEASE!

The newly released revised framework is based on the Health Education Specialist Practice Analysis II 2020 (HESPA II 2020), a 22-month project jointly undertaken by the National Commission for Health Education Credentialing (NCHEC) and the Society for Public Health Education (SOPHE) to update, refine and validate the most current model of health education practice.

The HESPA II 2020 model is designed for use by those in the health education & promotion profession as a framework for professional preparation, credentialing, and professional development. The updated hierarchical model consists of 193 Sub-competencies, organized into 35 Competencies within 8 major Areas of Responsibility. Additionally, the knowledge base needed by health education specialists was organized into 10 conceptual topic areas, and 145 knowledge topics were

validated as being used by health education specialists.

The publication is an essential resource for health education students, college and university faculty, health education practitioners and employers, professional development providers, leaders of professional credentialing and program accreditation, and policy makers and funding agencies.
